Bob can you confirm - I believe we discussed the challenge in time/resources with rule-making and exploring voluntary approaches as a first step so can get some positive outcomes in terms of info for the public and get some insights that could better inform a successful rule-making in the future.

Subject: Inquiry re inerts rulemaking

Happy New Year, Marty!

Claudia Polsky of California left me a message asking for an update on the inerts rule. When I call her back today, what should I tell her? IIRC, OPP told enviros that you are still planning to move forward, but that resource limitations make it difficult to spend resources on it at the moment, and that there is no schedule. Is that correct?

Thanks.

Don
